Tll

U.S. Patent and Trademark Office PTOL-37 (Rev. 1-04) 1. This office action is in response to Applicants' amendment of 10/1/04.

1.1 Claims 1-6 are pending.

2. Claims 1-6 are allowable over the prior art. The following is an examiner's statement of

reasons for allowance:

2.1 The prior art of record is exemplified by **Tokura et al.** (US Patent No. 6,654,353).

Tokura's FIG. 17 depicts network monitoring wherein, 'when a fault occurs in link A3i3

during communication (S30), the resulting change in the network configuration is detected by

network A and node i, which therefore send bus reset signals (S22). As a result, node i performs

the extended bus initialization indicated in FIG. 12 (S21 and S22). As a result, as described

above, a route which bypasses the fault is formed, the self-identification and port arbitration

indicated in FIG. 12 are carried out (S29), and communication can again be restored (S30).

Links to be disconnected can be selected in an order which ensures that links which are

preferably used as trunk links are not disconnected. This enables a network configuration with

fewer series-connected nodes to be formed. The stipulations of <u>IEEE 1394</u> require that, after the

switches operate, no more than 16 nodes are connected in series and the number of nodes

constituting a network is no more than 63."

However, Tokura et al. does not teach or suggest alone or in combination display

apparatus/method comprising 'means for detecting an error which occurs in case where such a

state that there is a link for said network is detected, 'as claimed in Claims 1-6.

2.2 Any comments considered necessary by applicant must be submitted no later than the

payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Allowance."

**CONCLUSION** 

Such submissions should be clearly labeled "Comments on Statement of Reasons for

3. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks, Washington, D.C. 20231

or faxed to: (703) 872-9306 for all formal communications.

Hand-delivered responses should be brought to Customer Services, 220 20th Street S., Crystal

Plaza II, Lobby, Room 1B03, Arlington, VA 22202.

Any inquiry concerning this communication or earlier communications from the examiner should

be directed to Guy J. Lamarre, P.E., whose telephone number is (571) 272-3826. The examiner can

normally be reached on Monday to Friday from 9:30 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Albert

De Cady, can be reached at (571) 272-3819.

Any inquiry of a general nature or relating to the status of this application or proceeding should

be directed to the Group receptionist whose telephone number is (571) 272-3609.

Information regarding the status of an application may also be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications may be

obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is

available through Private PAIR only. For more information about the PAIR system, see

http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the

Electronic Business Center (EBC) at 866-217-9197 (toll-free).
